THE SCRUBS® PORTFOLIO

CLEAN

REMOVES DIRT AND GRIME

Cleaning products can be considered as effective as soap and water in removing dirt and grime from hands and surfaces.

SANITIZE

REDUCES BACTERIA

Sanitizing reduces the number of bacteria on hands and surfaces. Sanitizing is particularly important in food preparation areas where germs can cause foodborne illnesses.

DISINFECT

KILLS 99.9% BACTERIA AND VIRUSES

Disinfecting kills microscopic organisms (bacteria, viruses, fungi) on surfaces. Disinfection is achieved by using EPA-approved chemicals that kill the organisms on clean surfaces preventing them from spreading.
